

STILL FLYING WITH A FULL TANK

Earnings leaped 17% in the second quarter: Five quarters in a row of double-digit gains

Don't talk about soft landings to corporate executives. What they want is a way to stay aloft. And after a year of raising interest rates, the Federal Reserve's strategy to tamp down any hint of inflationary growth seems to be working just fine. Earnings for the 900 companies on BUSI-

NESS WEEK's Corporate Scorecard rose a robust 17% in the second quarter, on a 16% increase in sales. Although second-quarter earnings slowed from the torrid pace of the previous four quarters, they still marked the fifth straight quarter of double-digit gains.

Big increases in the computer chip

and oil industries are by far the main ingredients sustaining profits. Even though the quarter's increase is far from the 28% jump in the second quarter of 1999, profit growth is still extraordinary. "The economy acts like it might slow down, but at this rate that would take a while," says Suzanne Rizzo, an

other industries. Airlines, railroads, and other fuel-dependent transportation companies posted weaker earnings in the wake of higher fuel prices. Trans World Airlines Inc. saw a \$4.2 million loss for the quarter, largely because of a \$53 million increase in fuel expenses. Few companies were immune to higher oil prices. Quaker Oats Co. Chairman and Chief Executive Robert S. Morrison, for instance, says his company is having to swallow \$25 million this year—half of that in the second quarter—in higher prices for petroleum-based resins used in its Gatorade bottles.

The biggest loser of all, however, was the steel industry. While U.S. Steel Group and a few other steelmakers posted better results than in the first quarter,

LTV Corp. drove down the industry with a huge \$272 million loss, due mostly to a pretax \$205 million charge to shut down its iron ore mines. National Steel Corp., another loser, blamed an upsurge in imports and production snafus. Several big banks also came up losers because higher

interest rates crimped earnings. But in many cases, the weaker results were self-inflicted. First Union Corp. and Bank One Co., for example, took \$1 billion-plus restructuring charges relating to troubled recent acquisitions.

Still, Corporate America's solid quarterly performance may set the tone for the remainder of the year. Ironically, that "could be bad news for investors," says Prudential Securities Inc.'s Richard D. Rippe, whose firm is forecasting a 17% gain in profits this year and another round of rate hikes. The only question is how long U.S. companies can stay aloft before the Fed forces them to come in for a landing.

THE FED'S PINCH IS FINALLY CAUSING SOME PAIN

Until recently, most U.S. corporations seemed almost invincible. Sure, Federal Reserve Chairman Alan Greenspan pushed through six interest-rate hikes in the past 14 months. But profits kept piling up. Now, however, the effects of higher borrowing costs may finally be inflicting some pain.

Warnings about upcoming earnings disappointments have hit the news wires in recent weeks with almost alarming regularity. As of July 31, 26 of the 28 pre-announcements made by consumer-services firms were negative. "The bulk of these are coming from a slowdown in consumer spending due to higher interest rates," says Joseph S. Kalinowski, equity strategist at I/B/E/S. Despite strong first and second quarters for most companies, 10 of the 15 technology companies making announcements have warned of lowering earnings or that they expect to just match analysts' consensus, according to earnings tracking firm I/B/E/S. The companies range from retailer Nordstrom Inc. to computer-services company Unisys Corp. Already, computer makers were whacked in the second quarter when earnings fell 16%.

"MINOR IRRITATION." The trend is likely to continue. Borrowing costs are up nearly two percentage points over a year ago. Consumer demand has softened. And companies' ability to raise prices has all but vanished. True, it will take about a year before

rate hikes fully filter through the economy, but when they do, watch out. "Right now, interest rates are a minor irritation, but they will cut into profits eventually," says Sung Won Sohn, chief economist at Wells Fargo Co.

That's just what happened the last time the Fed embarked on a year-long tightening campaign, in early 1994. Corporate profits didn't take a big hit until late 1995.

This time around, analysts expect companies in the Standard & Poor's 500-stock index to see earnings gains trending down to 15.7% in the fourth quarter as higher rates work their way through the economy, according to earnings tracking firm First Call Corp. And while most investors believe the Fed's tightening campaign is nearing an end, they also worry about the consequences should the Fed make another move. "If the Fed has to ratchet up rates again, chances are companies could really get hurt," says Cary Leahey, a senior economist at Deutsche Bank Securities.

How badly? Demand for homes, cars, and retail items has already fallen "considerably" over the past three months, according to New

York researcher ISI Group. "Companies have been very quick to offer discounts and incentives to spur sales as consumer spending has slowed," says Jason R. Trennert, managing director at ISI. That's putting pressure on margins at companies ranging from electronics retailer Best Buy Co., which is offering no-cost financing on some appliances, to homebuilder Kaufman & Broad Home Corp., which is trying to cut costs through e-commerce initiatives like online auctions for contractors.

What might help companies this year is continued investment to boost productivity. Some 40% of the 127 companies in a July survey plan to boost capital spending in the next six months

to become more profitable, according to the National Association for Business Economics. "Productivity gains are helping to offset Greenspan's rate hikes," says Greg A. Jones, chief economist at Briefing.com, an Internet-based financial adviser in Burlingame, Calif.

Such gains can't come soon enough. If companies fail to achieve them, it's going to be tough to sustain profits. That's when those six hikes will really take a bite.

CORPORATE SCOREBOARD

Glossary

SALES: Includes all sales and other operating revenues. For banks, includes all operating revenues.

PROFITS: Net income before extraordinary items. For banks,

profits are net income after security gains or losses.

MARGINS: Net income from continuing operations before extraordinary items as percent of sales.

RETURN ON COMMON EQUITY: Ratio of net income available

for common stockholders (most recent 12 months) to latest available common equity, which includes common stock, capital surplus, and retained earnings.

PRICE-EARNINGS RATIO: Based on July 27, 2000, common-

stock price and corporate earnings from continuing operations before extraordinary items for most recent 12-month period.

EARNINGS PER SHARE: For most recent 12-month period. Includes all common-stock equivalents.
