

THE INSIDE WALL STREET SCORECARD

Here are the 160 stocks featured in Inside Wall Street during 2002. For each stock, we give the last closing price before the column became public, usually a Thursday. Then we compute the one-day, one-month, three-month, and six-month percentage returns. When

any of those periods ends on a weekend, the prior Friday's closing price is used. When a company is taken over within six months, we calculate prices up to the merger's effective date. The Thursday close is 11 days before the issue date.

- [†] SHORT. In calculating the returns on the short selling, we did not consider the leverage that sellers use. But in the

summary table on page 79, we assumed that short sellers borrowed 50% of the sale at an 8% interest rate.
