

Performance Ranking

S&P 500

What makes a top corporate performer? To determine how the companies in the S&P 500 index stack up against one another, *BusinessWeek* ranked all 500 using eight key criteria of financial success. We looked at growth in sales, profits, and return to shareholders. To reward consistency, we measured performance over both one and three years. And to get a better fix on which companies squeeze the most out of operations, we analyzed profit margins and return on equity. Then, we combined the individual rankings and added a weighting for sales volume and long-term debt-to-capital ratio to come up with our overall ranking. Using the individual rankings, we assigned grades for each measure. The top 20% received an A, the next 20% got a B, and so on, down to the F's in the bottom quintile.
