

# BUSINESS WEEK'S PERFORMANCE RANKINGS OF THE S&P 500

**W**hat makes a top corporate performer? To determine how the companies within the S&P 500 index stack up against one another, Business Week ranked all 500 using eight key criteria of financial success. We looked at growth in sales, profits, and return to shareholders. To reward consistency, we measured performance over both one year and three years. And to get a better fix on which companies squeeze the most out of operations, we analyzed profit margins and return on equity. Using those rankings, we assigned grades for each measure. The top 20% received an A, the next 20% got a B and so on, down to the F's in the bottom quintile. Finally, we combined the individual category rankings, and added a slight weighting for sales volume, to come up with our overall ranking.
